On page 11, line 24 replace "80" with -180 - .

**IN THE CLAIMS**

Please cancel claims 2, 10 and 13.

Please amend the claims as set forth below.

Please add claims 20-32.

1. (Presently Amended) A medical device, comprising:
  - a hollow barrel having an open rearward end;
  - a cartridge containing a quantity of fluid;
  - an inner housing slidably displaceable within the barrel, and having an opening for receiving the cartridge;
  - a needle having a sharpened tip in fluid communication with the cartridge;
  - an axially displaceable plunger operable to expel fluid from the cartridge;
  - a connector for connecting the plunger to the inner housing;
  - a first lock releasably retaining the needle in a projecting position in which the sharpened tip of the needle is exposed for use;
  - a second lock releasably retaining the needle in a retracted position in which the sharpened tip of the needle is shielded against inadvertent contact;
  - a biasing element biasing the needle rearwardly; and
  - an actuator manually operable to release the first lock for rearward retraction
